ASSASSIN BUG TAKING DOWN A BUTTERFLY
ASSASSIN BUG INGESTING PREY
CAN CARRY A POTENTIALLY FATAL TRYPAOSOME DISEASE
KNOWN AS CHAGAS DISEASE, IF UNTREATED
THE INTESTINES AND EVENTUALLY DEATH.
ALTHOUGH MANY AMBUSH BUGS ARE ONLY ABOUT
UP TO 25MM IN LENGTH, THEY ARE QUITE AMBITIOUS LITTLE
PREDATORS GOING AFTER BUMBLE BEES WHICH CAN GET
PAEDATOR. THERE HAVE EVEN BEEN RECORDED
SIGHTINGS OF THE PREY TAKING OFF WITH THE PREDATOR.
